

WHO DO I GO TO WHEN I NEED

HELP

WHO DO I NEED TO SPEAK TO

Early development -GP / Primary care physician
School - SENCO
Adulthood - family GP, friends & specialists
Keep diary of any concerns & issues
Follow your gut if you feel something may be wrong

SOCIAL MEDIA

We urge caution on social media. There are many individuals organizations which claim to be experts in special needs but will have relatively low if no experience in specialists settings.

SEN WORLD

We have a global directory of specialists who are verified in their field.
You can always contact on our WhatsApp and 24/7
We offer free independent consultation to parents of children and adults with SEN & MH Needs

HOW DO I KNOW IF THEY CAN HELP?

Ask questions:
Are they a specialist in their area?
Can they tell you which professional organizations they belong to?
Do you know any other parents who have used them. That you may be able to speak to?
You can always call SEN World for a second opinion

WHAT TO AVOID

- Claims from a professional that they can cure your son or daughter
- Professionals who do not belong to professional organisations and do not have their qualifications verified
- Parent knowledge is powerful and its always good to seek other parents advice, but remember every child is unique and every child's needs are different. What worked for one parent & one child may not work for you and your child. Always keep your options open and flexible.
